

Express Scripts Parking Deck

St. Louis, Missouri

Express Scripts needed additional parking at their new headquarters in St. Louis adjacent to the University of Missouri at St. Louis (UMSL) campus.

The emphasis for the 485 car parking deck was on speed of construction and the absolute necessity to have this structure blend with the traditional brick look of the UMSL campus.

The structural and architectural precast components were engineered, manufactured and installed on time and within budget. The goal of matching the architectural aesthetics on the surrounding campus was achieved.

“The clear advantage to me of using precast is the speed, quality control of the product and the fact that you are not as susceptible to many of the weather elements that can hinder a project schedule.”

Mike Rallo, Jr., Paric Corporation

**MA MID AMERICA
PRECAST, INC.**
SPECIALIZING IN CONCRETE BUILDING AND UTILITY PRODUCTS

Mid America Precast produces high quality architectural precast concrete products for the building industry. Mid America Precast is a PCI certified A1 producer.
